
Examining a Security Token

This exercise assumes that you have not turned off the UAC and that you are the administrator of the operating system.

1. Click the Start menu, type **cmd**, and then press Enter.
2. In the command prompt, type **whoami /ALL**, and then press the Enter key.
3. Record the privileges that you see in the output.
4. Click the Start menu and type **cmd**.
5. Right-click Command Prompt and select Run as Administrator.
6. Answer Yes to the UAC prompt.
7. In the command prompt, type **whoami /ALL**, and then press the Enter key.
8. Compare the privileges that you see in the output.

When you opened the first command prompt, it was opened with the standard user credentials of your account. When you opened the second command prompt, you selected Run as Administrator. The second command prompt was opened with the administrative security token.
