## Configuring Windows Update Active Hours

1. Click the Start button and choose the Settings gear.
  2. Click the Update & Security group on the Windows Settings page, and then click Change Active Hours.
  3. Choose the hours of normal operations of the computer.
  4. Click Save.
- 

Microsoft has an update server, Windows Server Update Services (WSUS), for large organizations that controls the update process for all hosts in the company.
